

JMP Productions Standardizes Presentation Solutions from KanexPro

JMP Productions creates innovative worship experience at St. Paul United Methodist Church in Wytheville, Virginia

Brea, Calif. - February 13, 2018 -

Incorporating an evolving technology has been an ongoing theme in house of worship centers for two thousand years. From the use of scrolls to the invention of the printing press, and the use of lanterns to the invention of electricity, and so on, worshipers have continuously adopted new technology in worship. JMP Productions, specializing in audio, video, consulting, sales and production, is recognized for creating innovative and technologically advanced Houses of Worship centers. Recently, JMP Productions worked with St. Paul United Methodist Church in Wytheville, Virginia to transform traditional services to contemporary services.

The Challenge

With nearly 800 members, it was critical for St. Paul United Methodist Church to ensure all their members attending services were able to observe the ceremonies. St. Paul United Methodist Church wanted simple-to-use, seamless audio and video to enhance the Sunday worship experience. It included two main displays, with additional televisions in the hallway and streaming capabilities.

“St. Paul United Methodist Church required an easy to use audio-visual switcher which would seamlessly plug-and-play”

Justin Plaster, owner of JMP Productions

The Solution

JMP Productions worked with a local manufacturer representative from the Southeast, Jay Andrews from **Lineau AV Associates**, to find the ideal solution. “My rep, Jay Andrews at Lineau AV Associates, led me to KanexPro’s solutions because my project with St. Paul United Methodist Church required an easy to use audio-visual switcher which would seamlessly plug-and-play,” said Justin Plaster, owner of JMP Productions.

“We needed a device that would connect laptops, DVD players, document cameras and high resolution cameras while routing HDMI over CAT6 to several displays, allowing me to share our video and audio content by extending distances. Jay recommend the HDBaseT Seamless Presentation Switcher and Scaler **SW-HDSC51HDBT** from KanexPro and I was immediately impressed once I installed the product.”

5 Input Seamless Presentation Switcher over HDBaseT up to 230ft.

The Impact

Installing an array of displays and enhanced audio, JMP Productions needed a connection device that was compatible with all displays while providing multiple inputs and uncompromised quality. “With the ability to switch and scale up to five devices to one or more displays, the HDBaseT Seamless Presentation Switcher and Scaler allowed me to transmit the high-definition video feed to distances up to 230 feet and support power over Ethernet to the receiver which was neatly tucked behind the display with a quick installation,” said Justin. “Now, our client couldn’t be more pleased with the product because it’s reliable and simple for anyone to use. It’s also fully controllable via remote, serial port or Ethernet.”

JMP Productions was struggling to find a product that would fit their specification guidelines entirely, until he was referred to KanexPro. “KanexPro’s Seamless Presentation Switcher and Scaler really impressed me because, often, I’ve found that manufacturers sold products that didn’t meet their specs,” said Justin. “I would purchase a product based on its ‘robust’ specifications and would later be greatly disappointed with the product once I received it. With KanexPro, that’s never an issue. All of the products that I’ve purchased from them are true to their specs. I’m really pleased that Jay at Lineau AV Associates recommended KanexPro’s solutions because it’s the only brand I use when it comes to video distribution. Anytime I need an extender or a switcher, I purchase KanexPro because I know I’m getting a product that matches its specs.”

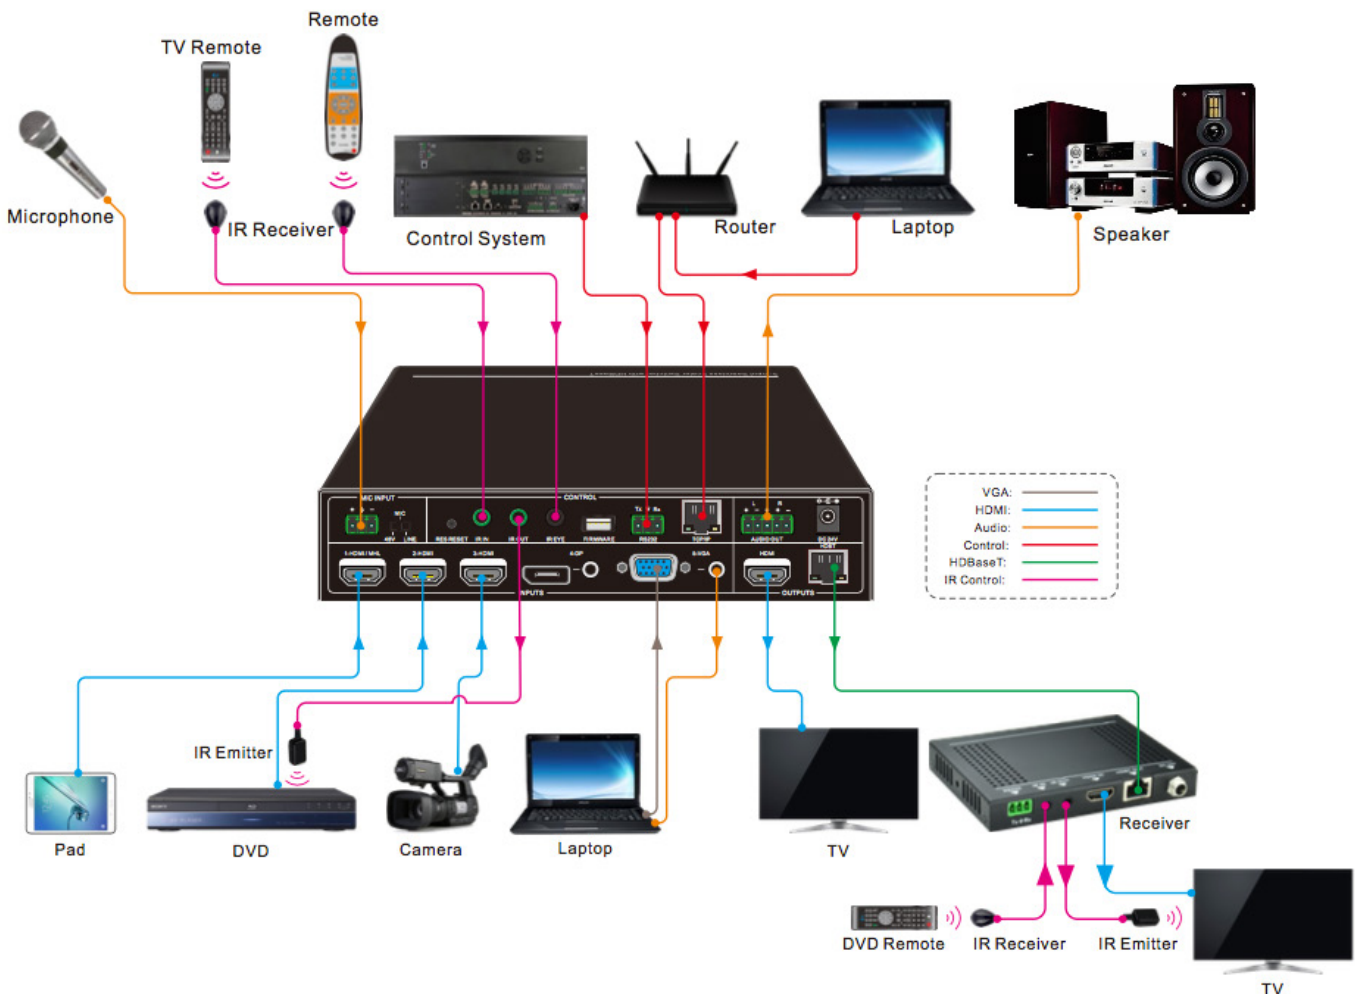

Product Info

The KanexPro Seamless Presentation Switcher and Scaler features five inputs, including HDMI, DP and VGA, with one local HDMI output and one HDBaseT output. Supporting instant switching with zero latency, the Seamless Presentation Switcher and Scaler is compliant with the latest HDCP 2.2 specs, supports CEC commands and EDID management, and the output can be extended with Power over HDBaseT (PoH) up to 230 feet. With a built-in audio de-embedder for HDMI and VGA inputs, the Seamless Presentation Switcher and Scaler includes an IR remote, as well as control via buttons, RS232 and web-based GUI. Product Application for Church or Other

Testimony

The project at St. Paul United Methodist Church expands an existing portfolio of installations that Justin and his team at JMP Productions have provided to numerous Houses of Worship. "I recommend KanexPro to Houses of Worship and integrators because of the ease of use and reliable support," said Justin. "KanexPro's devices plug-and-play while providing extensive capabilities to fit various video needs. If my customers ever need support, I'm able to troubleshoot and explain conveniently how to use the product because there's no programming - you just plug it in and it works seamlessly. In addition, KanexPro's staff is always available and willing to answer any questions. If I ever experience an issue with a product, they're always quick to solve my problem and get everything back up and running. Through their expert customer service, I'm able to provide my customers with high-quality service and support."
