

6-Input Collaboration Switcher & Scaler with 4K HDMI Output

Switch & Scale Six inputs to one 4K Display

MPN: HDSC61D-4K

The KanexPro HDSC61D-4K is a 4-input HDMI, and 2-input VGA collaboration scaler ideal for switching up to six AV sources to one HDMI display. This switcher scaler also supports 4K resolutions to match the latest display standards and performs a feature known as "Output Blanking" to cut-off on screen video when switching between different sources, perfect for corporate boardrooms or small huddle rooms where HDMI, DisplayPort or VGA switching is needed to one display.

This 6-Input scaler-switcher also features audio de-embedding through three de-embedded audio outputs via 3.5mm stereo, including a Toslink optical output. For control options, it can be paired virtually with any 3rd party control system using RS-232 drivers or controllable by front-panel buttons and IR.
