Helpful Tips & Recommendations:

- CAT-5 cables should not exceed 330 feet or (100m).
- Please adhere to the TIA/EIA568B standards when terminating network cables in the field.
- Shielded CAT5/6 with metal RJ-45 connectors are recommended to safeguard against random video flashes caused by electromagnetic interference (EMI).
- Do not use crossover cables, patch cables or Ethernet couplers to extend two CAT5 cables. This may damage the Tx & Rx.
- If the power LED indicator on the Tx/Rx unit is not on, check to make sure that the CAT5 cables are not crossed i.e., Ethernet to Link instead of Ethernet to Ethernet.
