## 1. Introduction

The KanexPro EXT-HDBT70M is a compact TX/RX extender set using HDBaseT technology to transmit uncompressed 1080p/4K signals up to 230ft / 70m (1080p) or 130ft / 40m (4K/30) over a single Cat5e/6a cable. Supports CEC, bidirectional RS-232 & IR, and bidirectional PoH.

## 2. Features

- ✓ UltraSlim metal enclosure with mounting ears
- ✓ Supports 1080p to 230ft / 70m and 4K/30 to 130ft / 40m over single Cat5e/6a
- ✓ HDMI 1.4 and HDCP 2.2 compliant — 10.2Gbps bandwidth
- ✓ Bi-directional PoH — one adapter powers both TX and RX
- ✓ Bi-directional RS-232 and IR control pass-through
- ✓ CEC pass-through for TV remote integration
- ✓ LED indicators: LINK, HDCP, Power on both TX and RX
- ✓ Supports 3D video formats
- ✓ T568B Cat5e/6a straight-through cable required

### 3. Package Contents

1× TX, 1× RX, 4× Mounting Ears, 2× RS-232 Cables, 1× IR Emitter, 1× IR Receiver, 1× 24V/1.25A Power Adapter, 1× User Manual

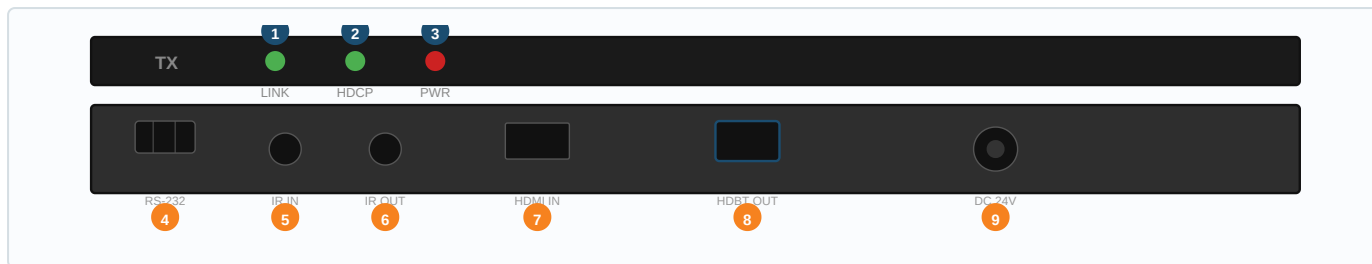

### 4. Specifications

		Technical
<b>HDMI Standard</b>		HDMI 1.4 / HDCP 2.2
<b>Bandwidth</b>		10.2Gbps
<b>Resolution Range</b>		640×480@60Hz up to 4K×2K@30Hz
<b>Transmission Distance</b>		1080p: up to 230ft / 70m   4K/30: up to 130ft / 40m (Cat5e/6a)
<b>Audio</b>		Digital audio pass-through via HDMI
		Connection — Transmitter
<b>TX Input</b>		1× HDMI [female]; 1× 3.5mm IR IN; 1× 3-pin Phoenix RS-232
<b>TX Output</b>		1× RJ-45 HDBT OUT; 1× 3.5mm IR OUT; 1× 3-pin Phoenix RS-232
		Connection — Receiver
<b>RX Input</b>		1× RJ-45 HDBT IN; 1× 3.5mm IR IN; 1× 3-pin Phoenix RS-232
<b>RX Output</b>		1× HDMI [female]; 1× 3.5mm IR OUT; 1× 3-pin Phoenix RS-232
		Mechanical
<b>Housing</b>		Metal Enclosure, Black
<b>Dimensions</b>		4.53" (W) × 0.64" (H) × 4.29" (D) / 115 × 16.2 × 109mm
<b>Weight</b>		TX: 0.43 lbs (193g)   RX: 0.43 lbs (196g)
<b>Power Supply</b>		AC 100–240V → DC 24V/1.25A; PoH bidirectional; 14W max
<b>Operating Temp</b>		32–122°F / 0–50°C   10–90% RH
		Certifications
<b>Regulatory</b>		FCC Class B, CE

## 2. Panel Description

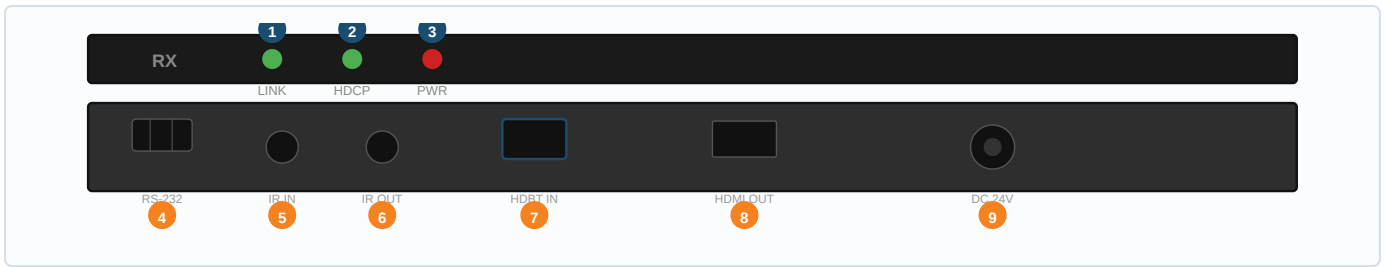

### 2.1 TRANSMITTER

No.	Name	Description
1	LINK LED	Green: link good. Blinking green: link abnormal. Off: no link.
2	HDCP LED	Green: traffic with HDCP. Blinking: traffic without HDCP. Off: no HDMI signal.
3	Power LED	Red when DC power present. Off: no power.
4	RS-232	3-pin Phoenix connector. Bidirectional RS-232 pass-through.
5	IR IN	3.5mm jack. Connect 5V IR receiver to collect remote signals.
6	IR OUT	3.5mm jack. Connect 5V IR emitter to control source/display.
7	HDMI IN	HDMI source input (TX only).
8	HDBT OUT	RJ45. Connect to HDBT IN on receiver via Cat5e/6a.
9	DC 24V	24V/1.25A power input. PoH: powers RX over Cat cable.

## 2.2 RECEIVER

No.	Name	Description
1	<b>LINK LED</b>	Green: link good. Blinking green: link abnormal. Off: no link.
2	<b>HDCP LED</b>	Green: traffic with HDCP. Blinking: traffic without HDCP. Off: no HDMI signal.
3	<b>Power LED</b>	Red when DC power present. Off: no power.
4	<b>RS-232</b>	3-pin Phoenix connector. Bidirectional RS-232 pass-through.
5	<b>IR IN</b>	3.5mm jack. Connect 5V IR receiver to collect remote signals.
6	<b>IR OUT</b>	3.5mm jack. Connect 5V IR emitter to control source/display.
7	<b>HDBT IN</b>	RJ45. Connect to HDBT OUT on transmitter via Cat5e/6a.
8	<b>HDMI OUT</b>	HDMI output to display.
9	<b>DC 24V</b>	24V/1.25A power input (optional if TX provides PoH).

## Troubleshooting

### Q: No image on the display?

A: Verify HDMI cables are connected and working. Confirm Cat5e/6a cable is undamaged, straight-through, and T568B terminated on both ends. Check that the LINK LED is solid green. Ensure power is applied and ground is properly connected.

### Q: LINK LED is blinking — what does that mean?

A: Blinking indicates an abnormal or poor connection. Check cable termination at both ends, verify no sharp bends or damage, and confirm the run does not exceed the rated distance (230ft / 70m for 1080p; 130ft / 40m for 4K/30).

### Q: Color loss or poor picture quality?

A: Verify HDMI cables at source and display are high quality and firmly connected. Ensure proper grounding of the power supply. Check that the Cat cable shield is connected to the metal shell of the connectors at both ends.

### Q: IR control is not working?

A: Confirm IR Receiver is connected to IR IN and IR Emitter to IR OUT at the correct end. IR signals are bidirectional — TX IR IN passes to RX IR OUT, and RX IR IN passes to TX IR OUT. Verify 5V IR accessories are used.

### Q: RS-232 commands not passing through?

A: Verify 3-pin Phoenix connectors are correctly wired and fully seated. Confirm baud rate matches the control system specification. RS-232 is bidirectional over the HDBaseT link.

### Q: Only one unit is powering on?

A: PoH requires the Cat5e/6a cable to be connected before applying power. Connect the cable first, then power one unit. Verify cable continuity if the second unit still does not power on.
