

24x60 4K60 Modular Matrix Switcher with Built-In Video Wall

Maximum FLEX Output — 24 Sources to 60 Displays with 4K60 Video Wall & Quad View

MPN: FLEX-MF24X60

Sixty displays from one chassis. The FLEX-MF24X60 is the highest-output matrix in the standard FLEX line — purpose-built for convention centers, casino floors, large hotels, and campus-wide signage where output count matters more than input count. Five output card slots and three input slots route 24 4K60 sources to 60 screens with video wall, quad view, and independent scaling built in.

Every output independently scaled. CAT cards reach 230ft. CEC powers displays by zone. 7" touch + Web GUI + RS-232 + TCP/IP. Cards shared across all FLEX chassis sizes.

 24x60 Maximum FLEX Output	 Video Wall 30 Zones 4x3	 4K60 18Gbps HDCP 2.2	 60 Out 5 Output Card Slots	 Hot-Swap Zero Downtime

KEY FEATURES

- 24 inputs • 60 outputs • the largest standard FLEX chassis (3 input + 5 output card slots)
- 4K/UHD 60Hz 4:4:4 at full 18Gbps bandwidth with HDCP 2.2 and HDR
- Video wall up to 4x3 (12 displays) with 30 independent zones and bezel compensation
- Quad view • independent per-output scaling • seamless switching
- HDMI and CAT output cards mix in any combination • CAT extends to 230ft (70m)
- CEC display control • EDID management (39 presets + 16 copy modes)
- 7" touch • Web GUI • RS-232 • TCP/IP • dual ASCII command APIs
- Hot-swappable cards • 100–240VAC • Korean-made • 3-year warranty

SPECIFICATIONS

HDMI Standard	HDMI 2.0 • HDCP 1.x / 2.2 • HDR
Max Resolution	3840x2160 @60Hz 4:4:4 (8-bit)
Bandwidth	18Gbps
Color Depth	8, 10, 12 bits per color
Audio	LPCM up to 7.1, Dolby TrueHD, DD+, DTS HD Master, DTS:X
Input	3 card slots (up to 24x HDMI via FLEX-HDMI8IN)
Output	5 card slots (up to 60x CAT/HDMI)
Video Wall	Up to 4x3 (12 displays), 30 zones
Control	RS-232 • TCP/IP • Web GUI • 7" Touch Panel
Dimensions	445x355x450mm (17.5"x14"x17.7")
Weight	21 kg (46 lbs)
